

VR in a case

by immersion

Bring virtual reality wherever you are

An
all-in-one
mobile
immersive
system
for
virtual reality

Photos : Immersion / Mathieu Courtois

- All-in-one: single projector, two mobile workstations, compact tracking system, interaction device, 3D glasses
- Mobile: an immersive system integrated in a flightcase
- Affordable turnkey solution
- Small footprint
- Easy and quick setup

Approx.
15 min
to setup

Applications

- Co-engineering
- Ergonomics
- Maintenance
- Marketing & Communication
- Sales support
- Training & Simulation
- Education

Dedicated to

Aeronautics, Aerospace, Architecture, Engineering and Construction, Automotive, Chemical Industry, Industrial Equipment, Offshore, Oil & Gas, Shipbuilding, Transportation...

Datasheet

Hardware

- Ultra short throw stereoscopic projector, 1280x720 resolution
- ART tracking system
- ART interaction device
- 3D glasses (x4), RF emitter and tracking target
- 4-port integrated powered USB charger for 3D glasses
- HP mobile workstations (x2), powered by NVIDIA graphic boards
- Audioconference microphone system

Technical features

- Image size: up to 110" (measured diagonally from corner to corner)
- Aspect ratio: 16:9
- Projection: front projection (4000 lumens)
- Stereoscopy: active, 120Hz
- Power consumption: approx. 1000W
- Weight: less than 42kg (including flightcase)
- Dimensions: 79 x 59 x 46 cm (L x W x H)
- Warranty: 1 year
